PORTEAND, ILESDAY, JUNE 23, 1885 THERETION IN LATS-PAR

The virtual attance between the prohibit, n

farts and the democratiparty is a fact, which during point years just, his escaped no close observer suction. It is a case where extrames meet. The lenus raid surty is the great bul-wark of the 1 puor traffic. If the country yet the problet non party openily plays not its hand, and it in turn encourages the prohibition purty to keep the feld in order that the republican parts may be weakened thereby. The net reure of protection on the other. It is a ole nells which the vain and visionary no rous structs with the vain and visionary no time of the probation takes are played upon for the currons of securing an unrestricted hoper that is, and is seeds admirably. The demonstration and set as a droft enough to make the probability as a dishelf work, though the fact is not as the it at prohibition has in the democratic party is strongest and most implicable enemy in it. North American Reductor for July (all) North American Rechic for July to til Han in has a second article on "Prohibition in I Cities," in which the fact above indicated The one hope of an unrestricted liquor traffic ie the democratic party, and the one hope of the democratic party is in the prohibition party Refore emperance as a public sentiment, as a moral principle, as a manly habit, the saloons lection contest, as a constitutional amendment, temperance is a more diversion from the main issue, is not feared, is indeed desired, by the democratic party There is not a state in which they do not hall it as a relief from impending immediate danger Intemperance apprehends no harm to it crafts from the prohibition parts, while absolution is always endan-lered by the triumph of the repubican party The democratic parcy, with its principles outspoken and its record read of all men, has no chance before the people! In the south, where the democratic party has intrenched itself by force, political prohibition is not suffered to move the wing or open the mount or peep. In Georgia three-fourths of the cut lies enforce probabilion in Georgia, of a total vote of 143,610, the problation candidate received 195. But in the north, where the dom ce alic party is weak, it cherishes prohibition like a cursing mother, and its caresses are re-furned with a collegive fondness. Straighl as if winged from a democratic bow the prohibition arrow flew to the states where the democratic party had the best show for victory — Torput in all the states where it could harm the democrati-to party and where it could not vitally harm the republican party, it was active in those states against republicans. What has been done may be done again, but it will be better understood Prohibitionists may continue to be democratic Aiffee, lat they will not be so well disguise litera

The principle of this sort of thinks www._ and the practice is even worse. Each 'pro-fessor' must have his party, all under pay, and when he remains he must spend the writer in writing a report. This report, which must be printed at the government expense, includes oftentimes illustrations which cost a fortune for a single vo'ume. The expense is enormous and it is for no practical good. Of course the pic-tures are interesting, but it is not the duty of government to supply for special circulation art works or interesting literature.

If the government has money to spare for speculative study, let it be devoted to experimenting on the plants with a view to introducing water or let it be spent in exploring Alaska. But while we are in need of a thousand practical improvements, while our reservant hardways. tical improvements, while our rivers and harbors

need attention, while our coasts are undefeuded

and while we have no navy nor even a library to

store our books, no money should be spent on and sologic puzzles these enterprises are managed with great tact. Almost every professor who gets a commission fills up his party with the sons or buchters of coursin of sensors and ouggess men, and thus engages ahead support for his next season's raid on the treasur, Or, if an important man can not be influenced in this way, the professor who wants his help dedicates to be above such consi lerations are engaged by their interests or through the r vanity to sup-port these woong and foolish measures of pub-in expense

AN OLD CLESSON FORENMERINES

Under the inspiriting influence of the molto-"A Hear of Wheat is Better than a Book," and with the commendable enterprise and energy in behalf of the test interests of the state that has characterized the action of those who manage the affairs of the hoard of more gration, details have been put afront which, when compilete, will result in thoroughly advertising Oregon, at least to the people of some of the western states. As soon as it is possible to obtain specimens of grain from the harrast fields of the current year, a car will be handsomely fitted out with samples of what Oregon can do in the way of cereais, namerals, woods, fruits, vegetabies and descriptive matter a thoroughly in-formed man will take up his abode therein, and the whole will be started on a missistant tour. This is only made possible through the courtesy of railway managers, who, controlling roads to this point and those ralliating trans Chicago, Des Momes, Detroit and other polars, have offered gratuitous transportation for Oregon's specimen car, it is to dien to side-frack the cur at county fair towns, and other interior places and make an exhibit or give a sort of illustrated lecture from the platconverts like visible and tangible things, and we think our loand of immigration have wisely chosen among ways of doing good to tha state. It deed we think this plan could be pursued profitably, even at the cur adment of expenditure in the rooms to this cky. We should maintain our immigration beacquarters here, but an immigration toard in the field will make converts more rapidly, and make them out of a better class, we apprehend. Our lown visitors are enthusiastic over the plan of the Gregor car, and promise it is plended reception at state and county fairs. We hope that our furner friends will aid in this good work by forwarding those samples of grain, grusses, et., t. the inomigiation board in this city.

He sirtual disance between the prohibit; n jath in 1 the lemora party is a fact, which during some years post, his escaped no checoherter's notice. It is a case where extremes rest. The lemorate purty is the great balwark of the higher truth of the country retires purchable on party openly plays into its hand, and it in turn encourages the prohibition party to keep the field in order that the republican par y may be we sened thereby. The ne' reof this is prevenient of all proper regulation c: le squor from on the one hand, and of course f post ation on the other. It is a schene by which the vain and visionary no rose of the pushab mists are played upon for the rapose feecuring an unrestricted laps at it is and a reeds admirably. The demonstration in the promise are admirable to make the promise. u to do their work, though the fact is no to the that prohibition has in the democratic parfy recougest and most implicable enemy.

In the North American Lecture for July will Habe a has a second article on "Prohibition" hee," in which the fact above indicate i is set forth with pith and point. We quote "The one hope of an unrestricted inquor traffic is the democratic party, and the one hope of the emocratic party is in the problemion party Esfore temperance as a public sentiment, as a moral principle, as a manly habit, the saluons must go down. As a political plant, as an on contest, as a constitutional amendment. teniperance is a mere diversion from the main sea e, is not feared, is indeed deemed, by the democratic party. There is not a state in which they do not hall it as a relief from impending immediate danger. Intemperatures apprehends no harm to it crafts from the prohibition party, while absolutism is always endan-gered by the triumph of the repub-ican party. The democratic party, with its principles outspoken and its record read of all men, has no chance before the neonle! In the south, where the democratic party has not suffered to move the wing or open the mostly or peep. In Georgia three-fourths of the coulties enforce prohibition in Georgia, of a stal dote of 143,510, the prohibition candidate received 195. But in the north, where the demice of affer party is weak. It cherishes prohibition has a nursing mother, and its caresses are reformed with a collinaive fondiness. Straight as if winged from a democratic bow the prohibition arrow low to the states where the democratic party had the best abow for victory. Torpid to all the states where it could harm the democrat ic party and where it could not vitally harm the republican party, it was a tive in those states where even its small power could farm the full against republicans. What has been lone may be done ugain, but it will be better understood Probabitionists may continue to be democrati allies, int they will not be so well diagonal i lem

THE CASADIAN PACIFIC

The British government nowbas, or so or will I see, it own line of radir and a rese the American continent, and with this great with it has a new and a great opportunity. Sectlement of the maint deprote of finitish co-umbia has not been practicable in the peat, but this has to an indirect with make if any 19 matter. Our deprot has remort that course has a properties. dispatches report that a rate of \$25 for maintures will be made from British points to any point on the fine of the Caradian Pacific, and if the first true the country must so on raps B and so March 18 for the first true the country must so on raps B and so While the British Columbia, territories, are not equal to the American unidite-western they are not without many advantages and are capable of sustaining an enormous population. England now has a chance of adding to the of her American possessions, and at the same time of relieving her overpope ited istricts. And she cannot certainly slightest excuse from this time in of sending her imprudent and helpless classes to the I nited States, as she has done in the past in vinlation of all good neighborship and even of in-lernational decency. The vacant lands of British Columbia afford a fine field for the swams of poor Irish people who are all the starway in their present wretched districts It is altegether likely that the Capadian Parific will become an active competitor for the trans-continental trade not only of British Columbia but of the United States—It will be able to make

strong fight for this trade, and there are indications that this will be its policy. Transporta-tion is a matter of business, in which national or other other sentiment cuts no figure and if Pacific offers sufficient and a ements it will get a large share of American

result in thoroughly advectising Oregon, at least to the people of some of the western states. As soon as it is possible to obtain specimens of grain from the harvest fields of the current year, a car will be handsomely fitted out with samples of what fergon can do in the way of cereals, innersis, worsts, fruits, vegeta-bles and descriptive matter, a thoroughly informed man will take up his abode therein, and the whole will be started or a missensary four. This is only managers, who, controlling roads to this point and those ra linking from thicago, Des Mones, Betroff and office of others, have offered gratuitous transportation for Oregon's specimen car It is the idea to side-track the car at rounty fair towns, and other interior places and nake an exhibit, or give a sort of illustrated let use from the platgive a sort of linstrated let use from the plat form of the traveling unmigration beard. Nothing educates like an object lesson, mothing converts like visible and tangible things and we think our board of immigration have wisely chosen among ways of ding good to the state. In deed we think this plan could be pur-sued profitably, even at the curtainment of ex-penditure in the rooms in this city. We should immigrate not immigration beachwarters here.

Two Things (Brigon Should Sites—Mr W Burrage relimined last week in good health from a lour of the east. Meeting an (Neconian reporter, he said he wanted this paper to ward the people of this country against two pests which many districts east were burdened with. One was the English sparrow, the other black hass. Some years ago it became frashonable to indport the sparrows because it was thought they would destroy the cauker worm. Experience has shown that they do not touch the worm, but they have a terrible appointed to fruit bloceoms which never seems appeared. Mr Bu tage's advice is, if any haghest sparrow shows his head in Oregon 'shoot him on the spot.' The result with black bass, which were planted in many New England ponds (we call them lakes out there) is that they have destroped nearly every other family of fish in the same wpite's with them. They were pro-cited five years by law, and this gave ample me to so increase in numbers as to destroy all week enemies. The librat base is a very fine list, but it is harely worth the cost of all other on the series. Mr Burrage, accompanied by his wift, visited thing two stites and territo los in their firs, which was very emprable after two dy-four years' absence. They traveled over \$^{-1000} miles and were here thirly imputes behind time at a single station en route.

IMPORTATION (1809) NAN FRANCISCO —A visit to the steemest in dook any day after the arrival of a steemer from Nan Francisco will give some idea of the Pacific cosist goods which Portland distillates and consolnes. The columbia year-lands, was finishing filed distanging of the 1200 k us of freight she brought up—just an "every day cargo. It consisted principally of sugar, coffee and rice, and quite a quantity of har from from the dew rolling mills at Oakland, Califir min all consigned to jobbers in this city. This thought occurred. How many years will it be until Portland imports these staples direct, and turns they iron ore of this state into rails and into tars for blacksmither use.

Woot SHIPMENTS - Favorable rates having Woot Shipments.—Favorable rates having been made for the shipment of wools to the Atlantic sea loard, it was believed early in the season that much of the product of eastern Oregon and Washington would be diverted to new channels from the Pacinic coast. So far this eason the movement eastward has been so light as scarcely to be felt. No small part of the clip comes here to be graited and baled, and then shipped east a great deal comes to the pregon (ity and thownsville mills, and a great deal goes to San I rancieto, the relations between the wool growers and the commission bowers of that city being as close as ever.

RICENED WITHOUT SUN -After the partial RIFFMED WITHOUT SUN—After the partial inclining of the snow in January, while taking incrining wait, Mrs. A. D. Whitney of Olympia, filled her hust and a pockets with mosses gathered at the capitot grounds, among them, a try three-leaved, will strawperry, which she planted in a sea shell until it vined, when it was transplanted into a hanging basket. It now havined one yard and the inches, has had eight fines, has now five, also a tripe and a green terry, which is considered very remarkable, as it has grown centrely without sun. The bearins are a good size for wild ones.

I AN FIGURESH FIGURA ALASSA. The steam-ship Ancon will sail from San Frenesco for Fortland next Saturday with a cargo of combistitiles. She will replace the Idaho on the Alaska route for the July firp, a larger vessel being needed to accommodate the persenger travel. Two excursions, one from St. Paul, the other from Chicago, will go north next month. On the Idaho's arrival here she will load about 500 tons of wheat at Album, thus clerning out the O.R. & N. wirehouse.

ELLERAL—The funeral of blorger, Reader.

FUNEAL.—The flueral of Florence Brady took place yesterday afternoon from her late home on the corner of Stark and Fifth streets, and attracted considerable attention. Fourteen girls, dressed in white with black sashes, wreaths of white flowers on their heads and carrying houquets in their heads, preceded the procession to the Stark street ferry slip, where they took tarrages for the cemetery. The girls went has who took their first communion in the cathelic church with Miss Brady a few weeks ago.
